

Extract By Encounter Type

Encounter: Cytogenetics

Data Element Name	BORN ID	Data Element Definition	Pick List Value	Pick List Definition
Accession number or specimen number	CYTO002	Unique identifier - to differentiate between twins, repeat samples, etc.		
Clinical Indication	CYTO004	The reason that cytogenetics investigations were ordered		
Cytogenetic Analysis Test Name	CYTO005	The name of the specific cytogenetics test that was performed	ACHE-acetylcholinesterase	
			AF-AFP	
			Ashkenazi Jewish Screening Panel	
			Bleeding disorders, other	
			CMV (cytomegalovirus)	
			Connective Tissue disorders	
			Cystic Fibrosis	
			Embryoscopy	
			Entero Viruses	
			Fetoscopy	
			FISH	
			Fragile X	
			Hemoglobinopathy	
Hemophilia				
Herpes Simplex Virus (HSV)				
HIV				
Human Parvo Virus				
Karyotype				

Encounter: Cytogenetics

Data Element Name	BORN ID	Data Element Definition	Pick List Value	Pick List Definition
Cytogenetic Analysis Test Name	CYTO005	The name of the specific cytogenetics test that was performed	Microarray	
			Muscle	
			Myotonic dystrophy	
			Neuromuscular disorders	
			QF-PCR	
			Rubella	
			Skeletal disorder	
			Syphilis	
			Tay Sachs only	
			Toxoplasmosis	
			Varicella-Zoster Virus	
Other, specify:				
Unknown				
Cytogenetic Analysis Test Results	CYTO006	The results of the cytogenetics test		
Date of Sample	CYTO001	Date the cytogenetics sample was obtained for testing		
Tissue Type	CYTO003	Type of specimen sent for cytogenetic analysis
